Double Containment System
CONTAIN-IT Plus
metric

More than 50 Years of Application Know How

Our long experience in plastic piping systems applications is also for your security. Approvals and third party controls are guarantee for continuously

high quality. Many of our products have the necessary approvals of the relevant institutes and thanks to the batch identification they are traceable.

Fields of applications

Our specialists are proving their wide material knowledge and their application experience day by day in various industries:

- Water treatment
- Galvanics
- Automotive industry
- Cellulose and paper industry
- Textile industry
- Museums/Archives
- Waste water technical asset, with pollutant ingredients
- Waste water systems in water protection areas
- Battery production
- Chemical industry
- Semiconductor industrie/printed circuit board production
- Waste water treatment/waste combustion
- Generating plant
- Metal processing/betterment
- Disposal drainage
- Life Science

Do you miss your application in the above list? No problem. Please call us, and we will find a solution according to your specifications.

Quality Products with Advantages

Advantage of Wide Product Ranges

Fittings
Hand Operated Valves
Pipes
Joining Systems
Actuated Valves
Measure and Control Technology
Machines and Tools
available in ISO/DIN

Advantage of Quality

Compound
Our own compound and strict quality controls for each raw material delivery form the basis for GF Piping Systems high quality products.

Production Know-How
Due to know-how gathered over 50 years we are able to produce our products to exceptionally high tolerances.

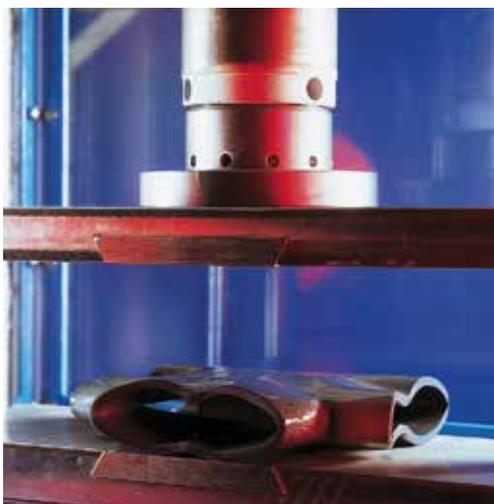

Advantage of Ecology

In the line with the ISO 14001 certification the environmental risks get systematically analysed and if necessary arrangements get discharged to minimise them. Modern large concerns demand analysis of the deliverers and GF Piping Systems supports that actively. Most of our companies are already successfully certificated or the process of certification is in progress.

Quality management system certified according to ISO 9001/ISO 14001 and OHSAS 18001

Advantage of Production Quality Control Tests

The double containment system consists of standard single components, which come under different component scrutiny.

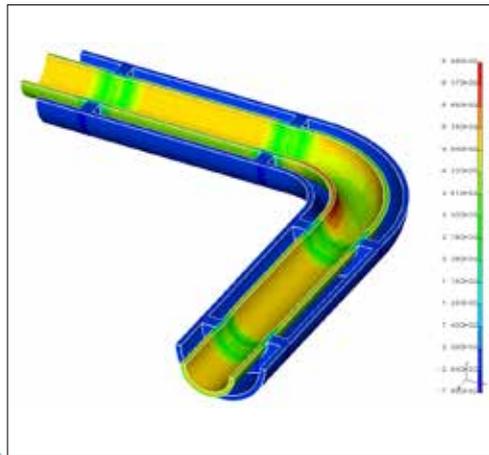

- Pressure Pulsation Testing 100 h Test
- Chemical Resistance
- Functions
- Temperature Cycling Test
- Cyclic Bending Test

Accredited laboratory for components of plastic piping systems according to SN EN ISO 45001

for Professional Users

Advantage in Planning

Many customers prefer to purchase the complete piping system from one supplier. Because only systems that are designed to complement each other guarantee easy planning, installing and efficient functioning of the piping system. The calculation of the piping system will be made with the most modern calculation program.

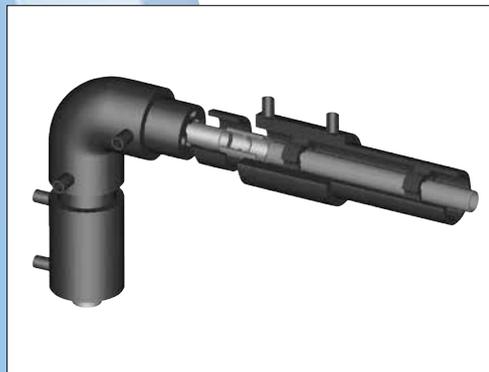

Advantage of Choosing the Right Material

For maximum safety and optimal durability of a piping system the choice of raw material and pressure class of the pipe parts is highly important. The raw material's suitability to the medium can be checked with the help of our chemical resistance list.

Advantage of Jointing Technology

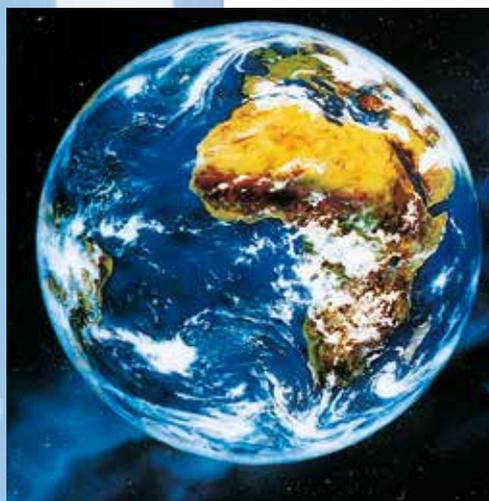

The patented Double Containment jointing technology enables to connect the double pipeline to be joined similarly to a single pipeline with stringent adherence to DVS guidelines. Thereby "blind fusions" are avoided. This kind of connection allows a pressure control on the inner pipe.

Advantage of Support

Training
GF Piping Systems offers training possibilities at our regional sales companies, in our own training center in Schaffhausen or at your premises.

Worldwide Distribution
Sales companies, representatives and dealers from GF Piping Systems can supply you with complete technical advice, punctual distribution and fast service in almost every corner of the world.

Double Containment System – Contain-IT Plus

Hazardous media leaking from a piping system could cause damage to people, the environment or to machinery.

Therefore, double containment piping systems from Georg Fischer are excellent for safely transporting hazardous media.

Georg Fischer offers PVC-U, PVC-C, PP-H, PE and PVDF for the inner pipe, allowing for an optimal pipe material selection.

The outer pipe is available in either PE100 or PVC-U (transparent or grey).

To connect the PE100 pipe with the double containment fitting, ELGEF Plus electrofusion couplers have to be used. To connect the PVC-U pipe and the double containment fitting, EPDM couplers have to be used.

The following criteria are important for a safe process:

Separate joints of inner and outer pipe, guaranteeing a visible control of each fusion or cement joint according to DVS fusion regulations and KRV cementing guidelines.

The inner pipe can be pressure tested before connecting the outer pipe. This means that any leakage from the inner pipe would immediately be visible.

By using termination fittings the outer pipe can be partitioned into leak containment sections, facilitating leak detection.

Optimised diameter difference between inner and outer pipe. This means smaller outer pipe, smaller ELGEF Plus coupler, smaller pipe clips, less space needed, less jointing and installation time.

The inner pipe is pushed into the outer pipe after the spacers have been clamped onto the inner pipe. This means that there is no prefabricated double containment pipe, and the inner pipe can also be used as single pipe.

For most fusion joints standard fusion machines from Georg Fischer can be used.

Comparatively easy installation in difficult areas, such as shafts and along ceilings, by using cement jointing of PVC-U inner piping.

Georg Fischer recommends restrained installation. Therefore, Georg Fischer can calculate the resulting forces and tension, if required. These values are important for determining the correct locations for the fixing points. The fixing points for the inner pipe are given by the spacers in each double containment fitting. The working conditions, such as working pressure, working temperature and medium transported have to be documented in the "Questionnaire for Static Evidence of Secondary Containment Systems". Should the calculated tensions for a specific process be too high, the process parameters would have to be changed.

Calculation chart

Calculation of socket equal / snap ring / ELGEF Plus electrofusion socket or EPDM couplers

Needed number of pieces → /per	Socket equal	Snap ring	ELGEF Plus electrofusion socket for pressure-resistant outer pipe	EPDM rubber coupler for splash proof

References

CONTAIN-IT Plus – Special Parts

We have kept the contain-It Plus range deliberately slim; to complement this, we have on offer a large range of special parts made to order for customer specific requirements.

Valves

Ball valve to d63/110 mm as part of the standard products range, larger dimensions as well as diaphragm and ball check valves available as special parts.

Tees

Tee 90° equal as part of the standard products range, reduced Tees and Tees 45° available as special parts.

Assembly groups / Sections

Special parts are available for cramped condition applications or as bespoke solutions with premanufactured combinations of fittings and reduced lengths.

Fittings

Elbows 90° and 45° are part of the standard products range, elbows with differing angles (e.g. 15° or 30°) are available as special parts. Reductions and dimension converters are available as special parts. Fittings can also be manufactured as termination fittings.

☀ = Butt- and Infrared-(IR-Plus®) compatible

The designation «Nominal Pressure» (PN) on its own is not sufficient any more!

The PN classification generally used all over the world is confusing where butt fusion is concerned. In the case of thermoplastic piping systems the established practice is to use pressure-neutral descriptions for pipes and fittings of the same pressure capacity. This should eliminate the wrong selection of piping components for different applications or working conditions.

According to ISO 4065 pipes are classified into series (S), whereby pipes of the same series allow for the same working pressure, as is also the case with the nominal pressure levels. The series are denoted by the letter S. S is a dimensionless quantity.

As an example, for 110 x 10 mm PP pipe:
 $S = 5 = (110-10) / (2 * 10)$

Furthermore, SDR (Standard Dimension Ration) is also used. SDR is the ratio between the pipe outside diameter (d) and the pipe wall thickness (e).

$$SDR = \frac{d}{e}$$

Series and SDR are connected by the formula:

$$SDR = 2 * S + 1$$

In the case of the example above:

$$SDR = 110/10 = 11 = 2 * 5 + 1$$

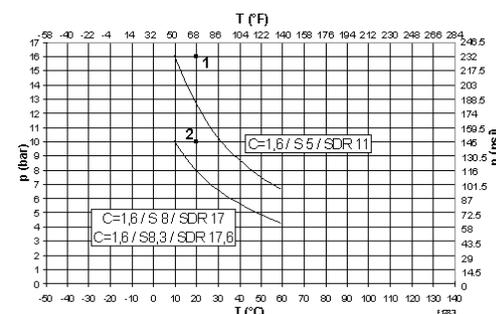

All three designations, PN, S and SDR are currently used by the market. Therefore, we recommend always giving the pipe dimension, wall thickness, as well as the pipe series S or SDR.

The following pressure-temperature-diagrams are based on an operating life of 25 years.

Safety factors at variance with these and modified operational lifetime necessitate separate calculations.

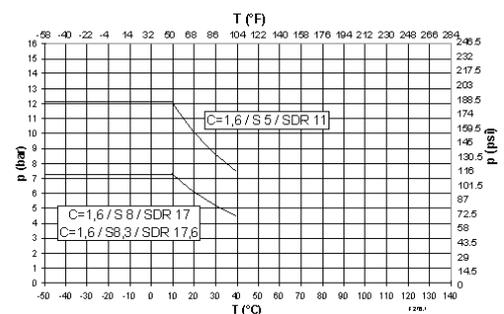

Pressure/Temperature Diagram

Application Limits of Pipes and Fittings made of PE100 (Eltex TUB121[®], CRP 100[®])
 (25 years operation with design-factor = 1,6 or 1,25 incorporated; water or similar media)

- 1 Design Factor C=1,25 / S 5 / SDR 11 for 20 °C water / 50 years
- 2 Design Factor C=1,25 / S 8,3 / SDR 17,6 and S 8 / SDR 17 for 20 °C water / 50 years
- T Temperature in °C / °F
- p permissible pressure in bar / psi

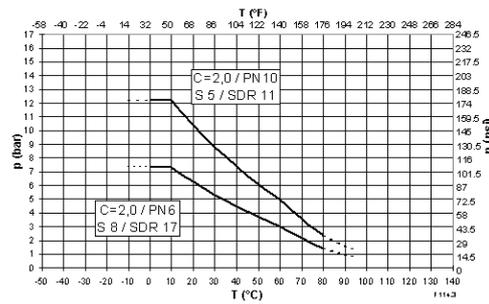

Application Limits of Pipes and Fittings made of PE80
 (25 years operation with design-factor = 1,6)

- P permissible pressure in bar / psi
- T Temperature in °C / °F

Application Limits of Pipes and Fittings made of PP-H

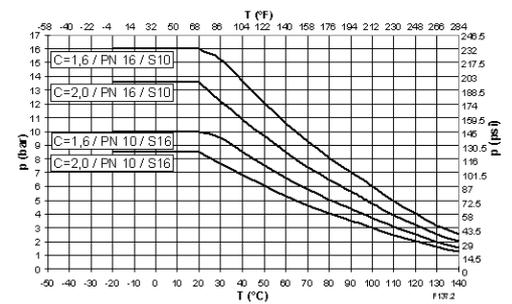

(25 years operation with design-factor = 2,0 incorporated; water or similar media)

T Temperature in °C / °F
p permissible pressure in bar / psi

Application Limits of Pipes and Fittings made of PVDF

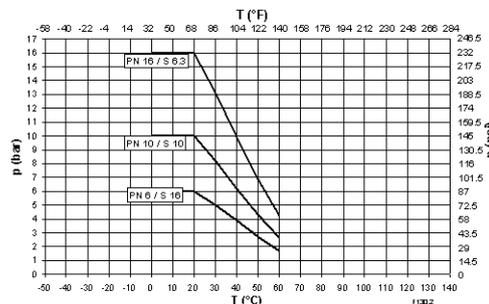

(water or similar media)

T Temperature in °C / °F
p permissible pressure in bar / psi

Application Limits of Pipes and Fittings made of PVC-U

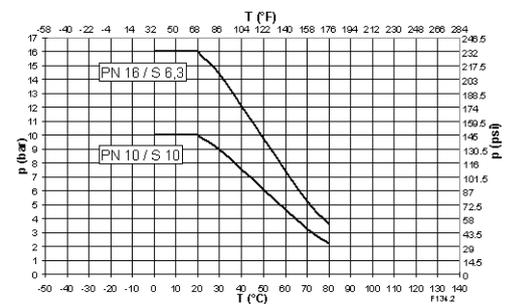

(25 years operation with design-factor = 2,5 incorporated; water or similar media)

T Temperature in °C / °F
p permissible pressure in bar / psi

Application limits of pipes and fittings made of PVC-C

(25 years operation with design-factor incorporated; water or similar media)

T Temperature in °C / °F
p permissible pressure in bar / psi

The pressure-temperature-diagrams mentioned above for pipes and fittings are designed to have a useful life of 25 years. Digressing design factors or a changed useful life make an individual calculation necessary.

MSA Plus 400 Traceability electrofusion unit With USB interfaces

NEW, environmentally friendly manufactured Electrofusion unit in accordance with EU directive 2002/95/EU (RoHS).

Professional Electrofusion unit for traceability of piping system components from raw material to completed Electrofusion joint (in accordance with ISO 12176). The MSA units with the unique inverter technology and the active cooling system for trouble-free operation from generator or mains supply. Suitable for jointing in series. The unit is equipped with compact flash memory card (exchangeable data carrier) and either a barcode reader pen or barcode scanner. The unit is robust, light and easy to use. The menu has up to 27 different languages. Scope of delivery includes: 1 transport case, 1 USB memory stick, 1 pair of angle adapter clips 4.0 mm, operating instructions, configuration card and Software MSA WIN-WELD.

For printer or PC communication, the USB cable (799350619) is required.

Technical Data

Ambient temperature	-10 °C to +45 °C
Mains voltage	180 V - 264 V AC
Mains frequency	45Hz - 65 Hz
Fusion voltage	8 - 42 (48) V AC
Fusion current	max. 80 A
Power	max. 3500 W
Protection	1 / IP 65
Interfaces	USB (type A) for printer communication and to load software updates USB (type B) for PC communication
Mains cable	3 m
Fusion cable	3 m
Dimensions (WxHxD)	284 x 440 x 195 mm
Weight incl. cables	ca. 11,5 kg, light-weight aluminium housing
Display	LCD graphic, background light, contrast adjustment
Size display (WxH)	132 x 39 mm
Type size	8 mm
Languages	Brasilian, Bulgarian, Chinese, Croatian, Czech, Danish, Dutch, English, Estonian, Finnish, French, German, Hungarian, Italian, Korean, Latvian, Lithuanian, Macedonian, Malaysian, Norwegian, Polish, Portuguese, Romanian, Russian, Slovakian, Slovenian, Spanish, Swedish, Turkish
Warranty	24 months

General Condition of Supply of Georg Fischer Piping Systems Limited, Schaffhausen

1 General

- 1.1 These General Conditions shall apply to all Products supplied by Georg Fischer Piping Systems Limited («Georg Fischer») to the Purchaser. They shall also apply to all future business even when no express reference is made to them.
- 1.2 Any deviating or supplementary conditions especially Purchaser's general conditions of purchase and verbal agreements shall only be applicable if accepted in writing by Georg Fischer.
- 1.3 The written form shall be deemed to be fulfilled by all forms of transmission, evidenced in the form of text, such as telefax, e-mail, etc.

2 Tenders

Tenders shall only be binding if they contain a specifically stated period for acceptance.

3 Scope of Delivery

- 3.1 Georg Fischer's product range is subject to change.
- 3.2 The confirmation of order shall govern the scope and execution of the contract.

4 Data and Documents

- 4.1 Technical documents such as drawings, descriptions, illustrations and data on dimensions, performance and weight as well as the reference to standards are for information purposes only. They are not warranted characteristics and are subject to change.
- 4.2 All technical documents shall remain the exclusive property of Georg Fischer and may only be used for the agreed purposes or as Georg Fischer may consent.

5 Confidentiality, Protection of Personal Data

- 5.1 Each party shall keep in strict confidence all commercial or technical information relating to the business of the other party, of which it has gained knowledge in the course of its dealing with the other party. Such information shall neither be disclosed to third parties nor used for other purposes than those for which the information has been supplied.
- 5.2 In the context of the contractual relation with the Purchaser personal data may be processed. The Purchaser agrees to the disclosure of said data to third parties such as foreign subcontractors and suppliers etc.

6 Local Laws and Regulations, Export Controls

- 6.1 The Purchaser shall bring to the attention of Georg Fischer all local laws and regulations at the place of destination which bear connection with the execution of the contract and the adherence to relevant safety regulations and approval procedures.
- 6.2 In case of re-exports, Purchaser shall be responsible for compliance with pertinent export control regulations.

7 Price

- 7.1 Unless agreed otherwise, the prices shall be deemed quoted net ex works (according to Incoterms 2010 of the ICC, or latest version) including standard packing. All supplementary costs such as the cost of carriage, insurance, export-, transit- and import- licences etc. shall be borne by the Purchaser. The Purchaser shall also bear the costs of all taxes, fees, duties etc. connected with the contract.
- 7.2 If the costs of packing, carriage, insurance, fees and other supplementary costs are included in the tender price or contract price or are referred to specifically in the tender or confirmation of order, Georg Fischer reserve the right to revise their prices accordingly should any change occur in the relevant tariffs.

8 Terms of Payment

- 8.1 The Purchaser shall make payment in the manner agreed by the parties without any deductions such as discounts, costs, taxes or dues.
- 8.2 The Purchaser may only withhold or off-set payments due against counter claims which are either expressly acknowledged by Georg Fischer or finally awarded to the Purchaser. In particular, payment shall still be made when unessential items are still outstanding provided that the Products already delivered are not rendered unusable as a result.

9 Retention of Title

- 9.1 The Products shall remain the property of Georg Fischer until the Purchaser shall have settled all claims, present and future, which Georg Fischer may have against him.
- 9.2 Should the Purchaser resell Products to which title is reserved, in the ordinary course of business, he shall hereby be deemed to have tacitly assigned to Georg Fischer the proceeds deriving from their sale together with all collateral rights, securities and reservations of title until all claims held by Georg Fischer shall have been settled. Until revoked by Georg Fischer, this assignment shall not preclude Purchaser's right to collect the assigned receivables.
- 9.3 To the extent the value of the Products to which title is reserved together with collateral securities exceeds Georg Fischer's claims against the Purchaser by more than 20%, Georg Fischer shall re-assign the above proceeds to Purchaser at his request.

10 Delivery

- 10.1 The term of delivery shall commence as soon as the contract has been entered into, all official formalities such as import and payment permits have been obtained and all essential technical issues have been settled. The term of delivery shall be deemed duly observed when, upon its expiry, the Products are ready for despatch.
- 10.2 Delivery is subject to the following conditions, i.e. the term of delivery shall be reasonably extended:
- a) if Georg Fischer are not supplied in time with the information necessary for the execution of the contract or if subsequent changes causing delays are made by the Purchaser.
- b) if Georg Fischer are prevented from performing the contract by force majeure. Force majeure shall equally be deemed to be any unforeseeable event beyond Georg Fischer's control which renders Georg Fischer's performance commercially unpractical or impossible, such as delayed or defective supplies from sub contractors labour disputes, governmental orders or regulations, shortages in materials or energy, serious disturbances in Georg Fischer's works, such as the total or partial destruction of plant and equipment or the breakdown of essential facilities, serious disruptions in transport facilities, e.g. impassable roads. Should the effect of force majeure exceed a period of six (6) months, either party may cancel the contract forthwith. Georg Fischer shall not be liable for any damage or loss of any kind whatsoever resulting from the reform, any suspension or cancellation being without prejudice to Georg Fischer's right to recover all sums due in respect of consignments delivered and costs incurred to date.
- c) if the Purchaser is in delay with the fulfilment of his obligations under the contract, in particular, if he does not adhere to the agreed conditions of payment or if he has failed to timely provide the agreed securities.
- 10.3 If for reasons attributable to Georg Fischer the agreed term of delivery or a reasonable extension thereof is exceeded, Georg Fischer shall not be deemed in default until the Purchaser has granted to Georg Fischer in writing a reasonable extension thereof of not less than one (1) month which equally is not met. The Purchaser shall then be entitled to the remedies provided at law, it being however understood that, subject to limitations of Art. 16, damage claims shall be limited to max. 10% of the price of the delayed delivery.
- 10.4 Part shipments shall be allowed and Georg Fischer shall be entitled to invoice for such partial deliveries.
- 10.5 If the Purchaser fails to take delivery within a reasonable time of Products notified as ready for despatch, Georg Fischer shall be entitled to store the Products at the Purchaser's expense and risk and to invoice them as delivered. If Purchaser fails to effect payment, Georg Fischer shall be entitled to dispose of the Products.
- 10.6 Should Purchaser cancel an order without justification and should Georg Fischer not insist on the performance of the contract, Georg Fischer shall be entitled to a penalty amounting to 10% of the contract price, Georg Fischer's right to prove and claim higher damages remaining reserved.

Purchaser shall be entitled to prove, that Georg Fischer has suffered no or a considerably lower damage than the penalty forfeited.

11 Packing

If the Products are provided with additional packing over and above the standard packing, such packing shall be charged additionally.

12 Passing of Risk

- 12.1 The risk in the Products shall pass to the Purchaser as soon as they have left Georg Fischer's works (EX WORKS, Incoterms 2010 ICC, or latest version), even if delivery is made carriage-paid, under similar clauses or including installation or when carriage is organized and managed by Georg Fischer.
- 12.2 If delivery is delayed for reasons beyond Georg Fischer's control, the risk shall pass to the Purchaser when he is notified that the Products are ready for despatch.

13 Carriage and Insurance

- 13.1 Unless agreed otherwise, the Purchaser shall bear the cost of carriage.
- 13.2 The Purchaser shall be responsible for transport insurance against damage of whatever kind. Even when such insurance is arranged by Georg Fischer it shall be deemed taken out by the order of and for the account of the Purchaser and at his risk.
- 13.3 Special requests regarding carriage and insurance shall be communicated to Georg Fischer in due time. Otherwise carriage shall be arranged by Georg Fischer at their discretion, but without responsibility, by the quickest and cheapest method possible.
- In case of carriage-paid delivery transport arrangements shall be made by Georg Fischer. If the Purchaser specifies particular requirements, any extra costs involved shall be borne by him.
- 13.4 In the event of damage or loss of the Products during carriage the Purchaser shall mark the delivery documents accordingly and immediately have the damage ascertained by the carrier. Not readily ascertainable damages sustained during carriage shall be notified to the carrier within six (6) days after receipt of the Products.

14 Inspection, Notification of Defects and Damages

- 14.1 The Products will be subject to normal inspection by Georg Fischer during manufacture. Additional tests required by the Purchaser shall be agreed upon in writing and shall be charged to the Purchaser.
- 14.2 It shall be a condition of Georg Fischer's obligation under the warranties stated hereinafter that Georg Fischer be notified in writing by the Purchaser of any purported defect immediately upon discovery. Notice concerning weight, numbers or apparent defects is to be given latest within 30 days from receipt of the Products, notice of other defects immediately latest within seven (7) working days after discovery, in any event within the agreed warranty period.
- 14.3 Purchaser shall not dispose of allegedly defective Products until all warranty and/or damage claims are finally settled. At its request, defective Products are to be placed at Georg Fischer's disposal.
- 14.4 At its request, Georg Fischer shall be given the opportunity to inspect the defect and/or damage, prior to commencement of remedial work, either itself or by third party experts.

15 Warranty

- 15.1 At the written request of the Purchaser, Georg Fischer undertakes to repair or replace at its discretion, as quickly as possible and free of charge, all Products supplied which demonstrably suffer from faulty design, materials or workmanship, from faulty operating or installation instructions or which become defective or unusable due to faulty advice. In order to protect employees from toxic or radioactive substances which may have been transported through defective parts returned to Georg Fischer's sales organisation, said parts must be accompanied by a Material Safety Disclosure Form. The form may be obtained from Georg Fischer's local sales company or via www.piping.georgfischer.com. Replaced parts shall become property of Georg Fischer, unless Georg Fischer waives such claim.
- 15.2 For Products which are manufactured to specifications, drawings or patterns supplied by the Purchaser, Georg Fischer's warranty shall be restricted to proper materials and workmanship.
- 15.3 The Purchaser shall be entitled to rescind the contract or to demand a reduction of the contract price if
- the repair or replacement of the defective Product is impossible
 - the defective Product is not repaired or replaced within a reasonable period
 - Georg Fischer refuses the repair or replacement or if for reasons attributable to Georg Fischer the repair or replacement is delayed.
- 15.4 For Products or essential components manufactured by a third party and supplied by Georg Fischer under this contract, Georg Fischer's warranty is limited to the warranty provided by said third party.
- 15.5 This warranty shall not apply to damage resulting from normal wear and tear, improper storage and maintenance, failure to observe the operating instructions, overstressing or overloading, unsuitable operating media, unsuitable construction work or unsuitable building ground, improper repairs or alterations by the Purchaser or third parties, the use of other than original spare parts and other reasons beyond Georg Fischer's control.
- 15.6 No action or claim may be brought by the Purchaser on account of any alleged breach of warranty or any other obligation of Georg Fischer after the expiration of twelve (12) months from receipt of the Products by the end user or at the latest within eighteen (18) months of the Products being despatched by Georg Fischer.
- 15.7 In case of Products for use in domestic installations or in utilities
- Georg Fischer will assume the costs of dismantling the defective Product and restoring the damaged object up to CHF 1'000'000 per occurrence.
 - warranty or damage claims - contrary to Section 15.6 - are time-barred five (5) years from the date of installation or seven (7) years from the production date, whichever is earlier.

16 Limitation of Liability

The rights and remedies of the customer shall be exclusively governed by these General Conditions of Supply and shall be in lieu of any remedies at law. All further claims for damages, reduction of the purchase price, termination or rescission of the contract are excluded. In no case whatsoever shall the customer be entitled to claim damages other than compensation for costs of remedying defects in the supplies. This in particular refers, but shall not be limited, to loss of production, loss of use, loss of orders, loss of profit, third party recovery claims and other direct or indirect or consequential damages. This limitation of liability equally applies to the extent Georg Fischer is liable for acts or omissions of its employees or third parties engaged for the performance of its obligations. It does not apply in case of unlawful intent or gross negligence on the part of Georg Fischer's management and in case of Georg Fischer's statutory liability, in particular under applicable product liability laws.

17 Severability

Should any term or clause of these General Conditions in whole or in part be found to be unenforceable or void, all other provisions shall remain in full force and effect and the unenforceable or void provision shall be replaced by a valid provision, which comes closest to the original intention of the unenforceable or invalid provision.

18 Place of Performance and Jurisdiction

- 18.1 Place of performance for the Products shall be the Georg Fischer works from which the Products are despatched.
- 18.2 The contract shall be governed by Swiss law without regard to conflict of law provisions that would require the application of another law.
- 18.3 Any civil action based upon any alleged breach of this contract shall be filed and prosecuted exclusively in the courts of Schaffhausen, Switzerland. Georg Fischer however reserves the right to file actions in any court having jurisdiction over controversies arising out of or in connection with the present contract.
